PATENT
Docket No. 449122005700

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In the application of:

Friedrich MÜELLER

Serial No.: 09/831,139

Filing Date: June 21, 2001

For: DATA PROCESSING SYSTEM OR
COMMUNICATIONS TERMINAL
WITH A DEVICE FOR RECOGNISING
SPEECH AND METHOD FOR
RECOGNIZING CERTAIN ACOUSTIC
OBJECTS

Examiner: Paul V. Harper

Group Art Unit: 2654

REQUEST FOR REFUND

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Attention: Refund Section, Accounting Division Office of Finance

Sir:

Applicant respectfully requests a refund in the amount of \$ 950.00, for Extension of Time (Three Months), paid on August 23, 2004, and any other relief that the Commissioner may find fair and just because the after-final amendment was received by the U.S. Patent Office but was never processed (according to a telephone conversation with the Examiner). Applicant submit together with this paper, the following documents together with the postcard receipt, if any:

Copy of Amendment In Response to Final Office Action, filed May 24, 2004.

Copy of Information Disclosure Statement, filed May 24, 2004.

va-91382

BEST AVAILABLE COPY

Copy of the Status Inquiry, filed November 23, 2004.

Applicant timely filed a response to the Action dated February 23, 2004, thereby entitling the applicant to respond to the Action on May 24, 2004, (May 23, 2004 being a Sunday). The response of May 24, 2004, in light of the foregoing, should be considered as timely filed. Therefore, time should have tolled on the Action of February 23, 2004, and no Extension of Time Fees, or other papers due, for the following reasons.

The Amendment In Response to the Final Office Action, contained arguments which were found to be persuasive enough to allow the application. The Examiner failed to acknowledge or act upon or notify the applicants of the fact that the Amendment of May 24, 2004, and the arguments contained therein, had placed the application in the condition for allowance. Although applicant understand that no amendment must be entered as a matter of right after the final Action. It is applicant's contention that the Amendment, and the arguments contained therein, was sufficient to allow this case as of May 24, 2004.

It is the applicant's contention that since the Request for Reconsideration, filed as timely on May 24, 2004, placed the application in the condition for allowance that no extensions or even the Request for Continued Examination were needed in order to pass the application to allowance, a refund is due and just.

The Commissioner is respectfully requested to consider the above facts and determine if a refund is appropriate. Favorable consideration is earnestly solicited.

Docket No.: 449122005700

STATUS INQUIRY

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Sir:

Applicant respectfully inquire as to the status of this application.

The last Action filed in this application was a Notice of Appeal dated August 23, 2004.

In the event that the transmittal letter is separated from this document and the Patent and Trademark Office determines that an extension and/or other relief is required, applicants petition for any required relief including extensions of time and authorize the Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to Deposit Account No. 03-1952 referencing Docket No. 449122005700.

AMENDMENT IN RESPONSE TO FINAL OFFICE ACTION

MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

INTRODUCTORY COMMENTS

This is in response to the final Office Action dated February 23, 2004, for which a response is due on May 24, 2004 (May 23, 2004 being a Sunday). Accordingly, this response is timely filed. Reconsideration and allowance of the pending claims, as amended, in light of the remarks presented herein are respectfully requested.

Amendments to the Claims are reflected in the listing of claims which begins on page 2 of this paper.

Remarks begin on page 5 of this paper.

AMENDMENTS TO THE CLAIMS

Please replace the claims, including all prior versions, with the listing of claims found below.

Listing of Claims:

1-10. (Canceled)

11. (Newly added) A data processing system or communications terminal for recognizing speech, comprising:

a speech recognition device configured to recognize acoustic objects, where the acoustic objects comprise at least one of individual letters, combinations of letters or control commands; and
an acoustic device for acoustic output or optical display of recognized acoustic objects,
wherein

if an acoustic object is incorrectly recognized, the speech recognition device subsequently recognizes

a first control command causes a speech recognition algorithm to expect repeated utterance of the incorrectly recognized object, and

a second control command causes the speech recognition algorithm to output at least one further acoustic object, wherein

a recognition probability of the at least one further acoustic object is less than the recognition probability of the previously output acoustic object, but greater than the recognition probability of other acoustic objects, or the further acoustic object is provided by a sequence of entries in a storage device of the device.

12. (Newly added) The device according to Claim 1, wherein recognition of a third control command causes the speech recognition algorithm to assess the last-output object as correctly recognized, ends any output of further objects and/or triggers a function corresponding to the recognized control command.

13. (Newly added) A method for recognizing acoustic objects, comprising:

providing a recognition algorithm to recognize acoustic objects, where the acoustic objects comprise at least one of individual letters, combinations of letters or control commands; and acoustically outputting or displaying recognized acoustic objects, wherein if an acoustic object is incorrectly recognized, the recognition algorithm subsequently recognizes

a first control command causes a speech recognition algorithm to expect repeated utterance of the incorrectly recognized object, and

a second control command causes the speech recognition algorithm to output at least one further acoustic object, wherein

a recognition probability of the at least one further acoustic object is less than the recognition probability of the previously output acoustic object, but greater than the recognition probability of other acoustic objects, or the further acoustic object is provided by a sequence of entries in a storage device of the device.

14. (Newly added) The method according to Claim 3, wherein the recognition of a third control command causes the speech recognition algorithm to assess the last-output object as correctly recognized, ends any output of further objects and/or triggers a function corresponding to the recognized control command.

REMARKS

Claims 1-4 and 6-9 have been rejected under 35 USC 102(e) as anticipated by Haavisto. The rejection is respectfully traversed.

Haavisto fails to disclose providing a recognition algorithm to recognize acoustic objects, where the acoustic objects comprise at least one of individual letters, combinations of letters or control commands; and acoustically outputting or displaying recognized acoustic objects, wherein if an acoustic object is incorrectly recognized, the recognition algorithm subsequently recognizes a first control command causes a speech recognition algorithm to expect repeated utterance of the incorrectly recognized object, and a second control command causes the speech recognition algorithm to output at least one further acoustic object, wherein a recognition probability of the at least one further acoustic object is less than the recognition probability of the previously output acoustic object, but greater than the recognition probability of other acoustic objects, or the further acoustic object is provided by a sequence of entries in a storage device of the device, as required by the claimed invention (as amended).

In view of the above, each of the presently pending claims in this application is believed to be in immediate condition for allowance. Accordingly, the Examiner is respectfully requested to withdraw the outstanding rejection of the claims and to pass this application to issue. If it is determined that a telephone conference would expedite the prosecution of this application, the Examiner is invited to telephone the undersigned at the number given below.

In the event the U.S. Patent and Trademark office determines that an extension and/or other relief is required, applicant petitions for any required relief including extensions of time and authorizes the Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to Deposit Account No. 03-1952 referencing docket no. 4491122005700.

Application No.: 09/831,139
